

User Persona

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: Ken

Age and gender: 21, Male

Job: Economics (Pre-Law) Student

Income range: \$5000-\$15,000

Location: New York City

Background

Short bio: An ambitious Economics major at SUNY with a Pre-Law track. Inspired by retail trading legends, he spends his free time in his room trying to bridge the gap between abstract academic theory and the micro-mechanics of a live limit order book.

Lifestyle and values: Values a black box lifestyle: minimum social drama and maximum focus on personal growth. He is self-disciplined and prefers utilitarian tools over flashy, distracting apps.

Professional context: Operates in a high-pressure, self-teaching environment. He relies on a single laptop and lacks institutional support, making him highly sensitive to software bloat or overly complex jargon.

Audience Insights

Goals:

- Short-term goals:
 - Master tape reading by observing how bids and asks move in real-time.
- Long-term goals:
 - Accumulate enough trading capital to fund law school independently.
- Key drivers and priorities:
 - Financial Independence.

Barriers:

- Practical challenges:
 - Bloomberg-style terminals are too expensive and intimidating for beginners.
- Emotional frustrations:
 - Feeling lost in a sea of numbers without visual context; frustration with laggy interfaces.
- Obstacles to success:
 - High cognitive load from poorly organized financial data.

User Persona

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: John

Age and gender: 21, Male

Job: Computer Science Student

Income range: N/A

Location: Seattle, WA

Background

Short bio: A CS student who loves systems programming and low-level code. He wants to see the engine behind the market, not just the prices.

Lifestyle and values: Follows the black box model: he cuts out social drama to save all his energy for technical problem-solving. He values speed and raw data.

Professional context: He uses a Samsung Galaxy Note 20 Ultra to check his code and market data between classes.

Audience Insights

Goals:

- Short-term goals:
 - Understand the internal logic of how orders match (FIFO).
- Long-term goals:
 - Get a career in high-speed trading or systems optimization.
- Key drivers and priorities:
 - He wants to bridge the gap between classroom data structures and real-world financial systems.

Barriers:

- Practical challenges:
 - He can't afford professional trading data on a student budget.
- Emotional frustrations:
 - He hates laggy software that cares more about aesthetics.
- Obstacles to success:
 - Struggling to filter out irrelevant news to focus on raw order matching.
